

Multi-unit residential and commercial buildings running on green power!

The Good Energy Program offers rebates for Level 2 electric vehicle chargers installed at personal residences, commercial or multi-residential buildings and municipal or First Nation government-owned buildings.

For multi-unit residential or commercial buildings

Our multi-unit residential and commercial rebate covers:

- multi-unit residential buildings;
- apartments;
- commercial buildings;
- other work buildings; and
- institutional buildings, such as:
 - churches;
 - community centers; and
 - buildings owned by societies

Eligible chargers

We consider all dual-port charging stations to be 1 charging station for this rebate.

Eligible chargers must be:

- designated Level 2;
- 240 volt plug with output power between 3 kilowatt and 20 kilowatt; and
- connected to a network.

Eligible applicants

- Property owners with buildings located in the Yukon.
- A maximum of 20 chargers per building.

Rebate amount

75% of total costs up to a maximum of \$7,500 per installed charger. This offer is available until March 31, 2024 and is subject to available funding.

The rebate is based on costs related to the installation for:

- equipment;
- labour;
- electrical upgrades;
- construction; and
- contracting or professional expenses for upgrades to supporting infrastructure
