Works with **Apple HomeKit**

Works with **IFTTT**

works with **Hey Google**

SCHLAGE
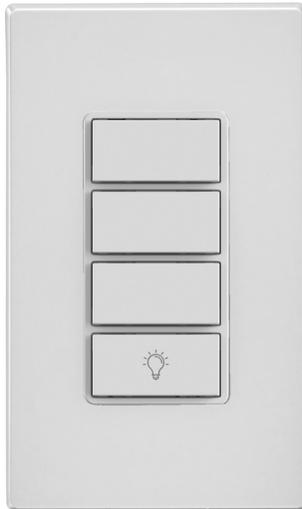

APPLICATION

Decora Smart Wi-Fi® 2nd Generation devices connect to a Wi-Fi network and the My Leviton app to provide wireless lighting and load control for the whole home. Leviton's Decora Smart Wi-Fi 2nd Gen Scene Controller Switch makes it easy to control lights and other connected devices with the touch of a button. Simply replace your existing light switch to get a smart switch and gain three extra scene buttons.

The Scene Controller Switch can be paired with the My Leviton app and Decora Smart Wi-Fi devices to create a wireless home lighting control system. The bottom button controls the built-in switch for wired loads/lights and works with Hey Google, Amazon Alexa, or Apple HomeKit/Siri for voice control.

Use the My Leviton app to assign custom room scenes or activities to the top three scene buttons, such as "Movie Time", "All Off", or "Dinner Time".

The Scene Controller Switch also works with Apple HomeKit – use the Apple Home app to set up control of any HomeKit scenes or accessories (requires Apple Home Hub and a compatible iOS device). Optionally, use with IFTTT to setup a wide range of automation to control smart home devices.

With three Scene control buttons and a built-in switch, the Decora Smart Wi-Fi 2nd Gen Scene Controller Switch offers an installed solution for flexible smart home control.

WORKS WITH MY LEVITON
Use the My Leviton app to assign specific functions to each of the 3 buttons on the face of the device. Within My Leviton, custom room scenes or automation activities can include any product from the Decora Smart Wi-Fi family including dimmers, switches and smart plugs.

SCENE BUTTONS
Use the My Leviton app for configuration of button functions including:
- ON or OFF of multiple Decora Smart Wi-Fi devices
- ON/OFF toggle control of an individual Decora Smart Wi-Fi device
- Capture and enable a My Leviton Room Lighting Scene such as "Movie Time"
- Run a My Leviton Whole House Activity such as "All Off"
- Trigger an IFTTT applet for expanded automation use cases
- Toggle My Leviton Home/Away Mode

Decora Smart Wi-Fi 2nd Gen Scene Controller Switch

LEVITON®

Decora Smart Wi-Fi 2nd Gen Scene Controller Switch

ON/OFF SWITCH

The built-in switch makes it easier than ever to install by simply replacing an existing switch and connecting line, load, neutral, and ground. The bottom button provides a smart switch for ON/OFF of the connected lights and can control motor loads up to 3/4 HP.

- Schedule connected loads to turn ON/OFF at specific times or based on sunrise/sunset
- Enable the auto-shutoff feature to act as a countdown timer in closets, hallways, and bathrooms
- Use the Away Mode to randomize lighting for a lived-in appearance when away from home

WORKS WITH AMAZON ALEXA™

Use your voice to control connected lighting via the built-in switch from compatible Alexa devices such as an Amazon Echo, Echo Show, the Alexa app, or the Decora Smart Voice Dimmer with Amazon Alexa Built-In.

WORKS WITH HEY GOOGLE

Use your voice to control connected lighting via the built-in switch with Hey Google or from the Google Home app.

WORKS WITH HOMEKIT

The Scene Controller's built-in switch works with HomeKit for control with Apple Siri or the Apple Home app. To control HomeKit scenes and accessories using the three scene buttons, you will need an Apple Home Hub, such as a HomePod, HomePod mini, Apple TV, or iPad.

WORKS WITH IFTTT (IF THIS THEN THAT)

Use the free IFTTT service to connect your My Leviton devices with a wide range of supported Internet of Things (IoT) enabled devices and services to create a smarter home automation experience.

WORKS WITH SCHLAGE

Use the My Leviton app to connect to your Schlage Encode™ Smart Wi-Fi Deadbolt and trigger lighting based on lock activity. Make certain you never walk into a dark home when you arrive and make sure select lights are turned on when leaving.

CUSTOM ENGRAVED BUTTONS

Personalize your device with custom engraved buttons* for scenes and activities easily ordered through the My Leviton app. Choose from six color options (white, black, ivory, light almond, gray, and brown) and install with the simple to swap color change kit.

Custom Engraved Buttons are currently available to U.S. customers only

3-WAY/MULTI-LOCATION CONTROL

Whether new construction or retrofit, a solution is available for 3-way and multi-way applications. The Wired Switch Companion offers additional in-wall control locations and communication when a traditional traveler wire is present.

For retrofits, Decora Smart Wi-Fi 2nd Gen devices are compatible with Decora Smart Anywhere Switch Companion, which is easily installed with no wiring required. This wire-free multi-location device looks like a traditional switch, installs quickly, and has a 5-year battery life.

WIRED   WIRELESS
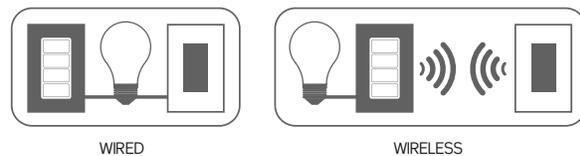

FEATURES AND BENEFITS

- Replace an existing light switch for control of the connected load and additional three (3) scene buttons
- The bottom button (Switch) provides ON/OFF control and works with Alexa, Hey Google, and Apple HomeKit/Siri for voice control
