Smart Restaurant Control Solutions

Combine energy code compliant solutions for automatic shut-off, daylight zone control, level control, dimming and plug load control with track light current limiting panels, signage control, scene control, event scheduling, thermostat control and demand response to create an ambient, functional and energy efficient space. Leviton can help you design the ideal restaurant space that allows you to enhance your customer experiences, improve the working environment for your staff and meet energy code compliance requirements. Whatever the size of your restaurant facility, Leviton gives you the ability to integrate scalable security systems, access controls and entertainment controls.

Lighting Controls

- Keeps lights on for simple energy savings when restaurant spaces are occupied and off when they are vacant
- Supports all modern lighting aesthetics including LED lighting
- Meets all codes and standards compliance and system compatibility requirements for lighting control

Daylighting

- Takes advantage of natural light to light a space instead of electrical lights
- Centralizes lighting control schedule to automatically adjust according to restaurant operating hours and events
- Integrates seamlessly into building management systems

HVAC Control

- Allows precise control over the HVAC system based on occupancy and schedules

Scene Control

- Delivers flexible pushbutton control solutions with easy operation, configuration and installation
- Provides preset scenes for different meal times, events and other unique lighting needs

AV Control

- Automates AV components with scalable solutions for bars, lounges, dining rooms and private dining areas
- Integrates with lighting and HVAC control access through a single user interface

Security Access Control

- Controls access and time-of-entry via keypad or card control
- Customize access to each user for schedules and privileges
- Video surveillance keeps a watchful eye over registers, lobbies, parking lots, kitchens and more

Submetering Solutions

- Monitors energy usage to improve bottom line operational costs
- Identifies energy-saving opportunities and verifies the effectiveness of conservation initiatives

Lighting Fixtures

- Provides accurate and controllable lighting
- Integral LED meets all current energy efficiency standards and carries a ten year warranty
- Color tuning technology allows color temperature adjustment in real time
