# HI-FI 2 DISTRIBUTED AUDIO

The powerful yet compact Hi-Fi 2 plays music from devices you already own (or those you wish to purchase). Installation is simplified with a built-in amplification unit mounted in a structured wiring enclosure.

The Hi-Fi 2 accepts local and remote inputs (in addition to optional Bluetooth), and each room can be controlled with either an in-wall Volume Source Control or a smartphone/tablet for control of power, audio source, volume, bass, treble, balance and more settings. Wiring remains simplified with Remote Input Modules and Volume Source Controls using Cat6 wire.

When installed in conjunction with a Leviton Omni or BitWise automation system, you can have a have music automated based on time or event. Turn all zones off at a certain time each night, press one button to enact a "party mode" and more.

### THE HI-FI 2 FOUR SOURCE, FOUR ZONE
The Hi-Fi 2 Four Source, Four Zone unit is a compact version of the revolutionary Hi-Fi 2 distributed audio system, ideal for controlling, sharing and listening to audio systems in townhomes, luxury hotel suites, condominiums and small office buildings.

*Hi-Fi 2 Four Source, Four Zone (95A00-2)*

| FEATURES | | |
|---|---|---|
| Free iOS and Android apps | Super efficient, cool running digital amplification | Two versions (4 rooms; 8 rooms expandable to 16 rooms) |
| Integrate with Leviton Omni and BitWise Automation Systems | Equipped with both serial and Ethernet ports for control | Optional Bluetooth inputs |
| Easy installation | | |

This is the most compact 4 zone, 160W system on the market today. Power output is 20W per channel at 8 ohms. It mounts directly into a Leviton Structured Media Center wiring enclosure at half-width. A kit is available with main amplifier, four Volume Source Controls, two Remote Input Modules, a remote control, and a stand-alone free app. Also available in an amplifier-only version. Operating Frequency: 2.402 MHz to 2.480 MHz. Maximum Output Power: +4.54 dBm.

### HI-FI 2 EIGHT SOURCE, EIGHT ZONE
The Hi-Fi 2 Eight Source, Eight Zone kit (expandable to 16 zones total), is the preferred distributed audio system for large residences and small businesses. Power output is 400W system, 25W per channel at 8 ohms, and the main amplifier mounts full-width into a Leviton Structured Media Center wiring enclosure.

*Hi-Fi 2 Eight Source, Eight Zone (95A00-2)*

# SYSTEM SOLUTIONS

A kit is available with main amplifier, eight Volume Source Controls, four Remote Input Modules, a remote control, and a stand-alone free app. The Hi-Fi Eight Zone, Eight Source system is also available in an amplifier-only version, with optional components attached as desired. Operating Frequency: 2.402 MHz to 2.480 MHz. Maximum Output Power: +4.54 dBm.

## MOUNTING INSTALLATION
Hi-Fi 2's main amplification units can be mounted within any Leviton Structured Media Center®. The Hi-Fi 2 Four Source, Four Zone unit mounts half-width in a Leviton SMC and the Hi-Fi 2 Eight Source, Eight Zone unit mounts full-width.

## IOS AND ANDROID APPS
Using a free stand-alone app, maintain total control over your audio experience by selecting a music source to play in a single room or throughout the entire property. Adjust volume levels throughout, change tracks, power on/off, and more.

*Bluetooth Remote Input Module (95A04-2)*

## LEVITON ARCHITECTURAL EDITION SPEAKERS, POWERED BY JBL
Whatever the application, when the specs call for JBL In-Wall and In-Ceiling Speakers, the performance is guaranteed to bring a new meaning to the phrase 'home entertainment.' Leviton/JBL pre-construction kits ensure that speaker locations and wiring are preserved and protected during construction, allowing for a cleaner, faster and more precise installation during the trim-out stage.
