

Classic, Seamless Control

Applications

IllumaTech Preset Slide Controls are designed for both single pole or 3-way applications. They feature a smooth, captured slide bar for fine adjustment of lighting levels and an easy to use push button that provides preset ON/OFF switching. Color change kits simplify inventory by diminishing the need for stocking separate devices in every color.

The IllumaTech Rotary Fan Speed Control combines the ease of a traditional rotary knob with the contemporary look of Decora® for quiet control of ceiling fans.

Features and Benefits

- Provides single pole or 3-way lighting control when used with a 3-way switch
- Comes packaged in White with Ivory and Light Almond color faceplates. Additional color change faceplates available
- LED locator light illuminates when load is off (select models)
- Appearance complements interiors and is compatible with other Decora devices
- Compatible with Decora Plus™ screwless and Decora standard designer wallplates
- Built-in radio/TV interference filter
- Fit easily into a standard wallbox and are suitable for multi-gang installations

Maximum Load for Multi-Gang Applications

In multi-gang applications derating may be required in accordance with the following chart. Many controls have side sections and fin removal is required (consult instruction sheets for further details).

Cat. No.	Single	2-Gang	3-Gang or more
IPL06-10	150W LED/CFL 600W Incandescent	150W LED/CFL 500W Incandescent	150W LED/CFL 400W Incandescent

Preset Slide Controls

- Fluid slide movement allows fine adjustment of light level with minimal effort
- Captive wraparound slide bar remains securely attached
- Easy to use push button switch with green LED locator light (select models)
- Push button switch acts as an air gap switch completely disconnecting power from unit for bulb changing
- Slide controls travel approximately 20mm
- Power failure recovery ensures retention of last setting before power interruption

LED/CFL/Incandescent Dimmers

- IPL06 is designed for optimal control of dimmable LED and CFL lamps. Also compatible with incandescent and halogen
- IPE04 is also compatible with Electronic Low Voltage lamps
- Wider dimming range on LED and CFL lamps than conventional incandescent dimmers
- Optional programming feature allows users to modify the dimming range to optimize low light level performance when required
- IPL06 and IP710 can be used to comply with 2019 California Title 24, Part 6 Indoor Lighting Switching Devices and Controls

0-10V LED/Fluorescent Dimmers

- IP710 dimmers are designed specifically for use with LED fixtures using 0-10V power supplies and Mark 7[®] 0-10V fluorescent ballasts
- Dual voltage 120V/277V; 50 mAmps maximum sink current
- No power pack required for switching

Fan Speed Controls

- Choose from slide or rotary models
- Quiet 1.5 Amp fan speed controls are ideal for bedrooms, libraries, study rooms and any area where ceiling fan noise could become distracting. Full range 5 Amp fan speed control also available

Typical Specifications

- Operating 0°C – 55°C
- Non-operating 10°C – 85°C
- Relative humidity, non-condensing 20% to 90%

Warranty Information

- Limited Five-Year Warranty

Agency Standards and Compliance

- UL Listed (Dimmers: File #E-31373; Fan Speed Controls: File #E-123566)
- CSA and cCSAus Certified (File#LR-3413)
- NEMA SSL 7A Compliant (IPL06 and IP710 only)
- California Title 24 Compliant (IPL06 and IP710 only)

Installation Considerations

Note: Sharing a neutral wire may cause flickering. Connect all devices to the same phase or run a separate neutral to each phase. Consult Leviton Techline if problems persist.

Warning: When retrofitting Mark 10[®] Powerline dimming ballasts into fixtures that originally had Instant Start ballasts, the sockets **MUST** be replaced with Rapid Start sockets to allow proper dimmer operation and prevent property damage, injury or death. Refer to the instructions provided with the ballast and the Leviton dimmer.

IPL06, IP710, IPE04: LED and CFL lamps marked or rated as dimmable can be used with these dimmers. For a complete list of approved LED lamps visit www.leviton.com/led

Use Leviton Power Extenders to extend the load capacity of box mounted dimmers. Leviton Power Extenders are available for incandescent, magnetic low voltage, electronic low voltage, Mark 10[®] Powerline fluorescent dimming ballasts or equivalents and 0-10 VDC dimmable fluorescent ballasts such as Mark 7[®] 0-10V, OSRAM Sylvania Quicktronic[®] Helios[™] or equivalent ballasts.

Mode Selector Switch

- Provides options to optimize performance for LED lamps to help ensure best performance for the load being controlled (factory preset to Mode A)
- Switch also enables the programming mode to adjust maximum and minimum light levels to match the full range of load and helps eliminate low end flicker for a smoother experience
