OmniTouch 7™

Touchscreen Demonstration Mode

APPLICATION

The OmniTouch 7 Touchscreen now features a helpful demonstration mode, without having to be connected to an actual Omni control system. Setting up demo mode to show the complete capabilities of a Leviton automation system is simple!

FEATURES AND BENEFITS

- Ensure your OmniTouch 7 has the latest firmware, (anything after 1.7)
- Power the unit by PoE injection (Leviton part number 90A00-1) and connect to a router with IP address assigned from DHCP server.
- Enter "DEMO1" as the Controller Address and hit submit
- The screen will refresh into demo mode so that your customer may get a feel for the interface that will control their home or business
- Every screen is responsive to the touch, from slider bar adjustments to dialing up a thermostat to setting a security system

OmniTouch 7 Demonstration Mode
