

# OmniTouch 7 Touchscreen with BitWise Controllers

## omnitouch™

The new capacitive touch, glass front Touchscreen from Leviton. Features a 7" diagonal viewing area at 800x480 resolution.

Designed for the BitWise BC1, BC2, and BC4 AV Automation controllers.

### APPLICATION

The OmniTouch 7 can now be utilized either as an interface for the Omni systems, or the new BitWise AV control systems. When running BitWise firmware, the Touchscreen will function similarly to the BitWise Touch app for Android devices. Touchscreens are required to be running firmware version 1.7 or higher before running the BitWise firmware, but Project Editor can upgrade your existing touchscreens to the required version via the Firmware Updater window. If a Touchscreen is running an earlier firmware version, Project Editor will first update it to 1.7 (or higher) before applying BitWise firmware.

### ORDERING INFORMATION

DESCRIPTION	COLOR	CAT. NO.
