Smart Hospitality Control Solutions

Combine energy code compliant solutions for automatic shut-off, daylight zone control, level control, dimming and plug load control with scene control, event scheduling, thermostat control, key card control and demand response to create an ambient, functional and energy efficient space. From hardwired solutions to wireless flexibility, Leviton can help you design the ideal hospitality space that allows you to enhance your guest experiences, improve the working environment for your staff and meet energy code compliance requirements. From a single guest room to an entire resort facility, Leviton gives you the ability to integrate scalable security systems, access controls and entertainment controls.

Lighting Controls

- Keep lights on for simple energy savings when hotel spaces are occupied and off when they are vacant
- Supports all modern lighting aesthetics including LED lighting
- Meets all codes and standards compliance and system compatibility requirements for lighting control

Daylighting

- Takes advantage of natural light to light a space instead of electrical lights
- Centralizes lighting control schedule to automatically adjust according to business operation and events
- Seamlessly integrates into building management systems

HVAC Control

- Allows precise control over the HVAC system based on occupancy and schedules
- Standalone room control

Scene Control

- Flexible pushbutton control solutions with easy operation, configuration and installation
- Provides preset scenes for different events, presentation styles and other unique lighting needs

AV Control

- Automate AV control with scalable solutions for lobbies, restaurants, ballrooms and meeting spaces
- Access from a tablet via customizable interface for simple programming and control
- Integrates with lighting and HVAC control with access through a single user interface

Security Access Control

- Controls access and time-of-entry via keypad or card control
- Customize access to each user for schedules and privileges

Submetering Solutions

- Monitors energy usage to improve bottom line operational costs
- Identifies energy-saving opportunities and verifies the effectiveness of conservation initiatives

Lighting Fixtures

- Provides accurate and controllable lighting
- Integral LED meets all current energy efficiency standards and carries a ten year warranty
- Architectural grade die-cast aluminum trims with designer finishes available by special order
