

VeriEye™ Wireless AMR Solutions Data Concentration Access Point

Quick Install Guide

Cat No. T25DX

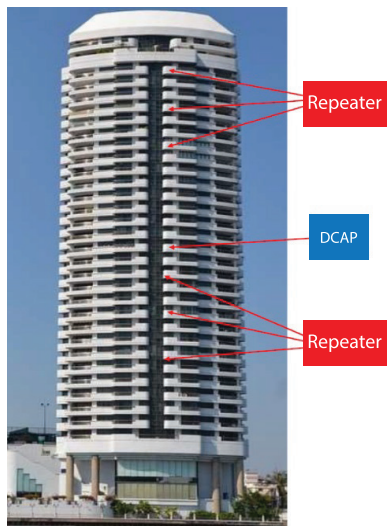

LEVITON®

DI-000-T25DX-00A-X0

Pre-installation: Locations, power and communications requirements.

DCAPs should be centrally located in both vertical and horizontal planes. The telephone/communications room is often a good location.

High-Rise Application

Mid-Rise Application

Garden Style Application

Startup, commissioning and operational prerequisites:

- Live internet connection
- 120v electrical duplex outlet

Installation:

1. Select a location to mount the DCAP. Two mounting holes in the top of the cover may be used to mount.
2. Plug in the power adapter to both 120v electrical duplex outlet and the DCAP unit.
3. Connect the Ethernet cable.
4. Confirm that Power light is on and green.
5. Confirm that Status light is on and green (allow time for boot up and connection to the network).

More information regarding installation and commissioning of the system is available from the Leviton website at: www.leviton.com, and search keywords SUBMETERING and COMMUNICATION SYSTEMS.

Configuration and Installation Tool Software is also available to qualified installers. Contact Leviton Metering Technical Support: Meters@leviton.com
