

VPT24-16Z 24-Hour Programmable Timer

That Can Be Used to Comply with 2019 California Title 24, Part 6, Outdoor Control Device Requirements

Leviton offers many products that help lower electrical costs and add convenience to everyday living. Replacing standard switches with timer switches can help reduce energy consumption and extend lamp life. It also provides homeowners with peace of mind by turning lights on and off automatically for a lived-in look while they are away.

Residential outdoor lighting requirements in the State of California have changed. Per the new requirements, timers used to control outdoor lighting must be programmed to OFF during daylight hours and have no more than a 6-hour manual override feature. Finding a timer that meets these new specifications can be challenging. Fortunately, Leviton offers the solution with the VPT24-16Z.

CHALLENGE

Residential new construction in the State of California must meet the 2019 Title 24 energy code requirements for outdoor lighting.

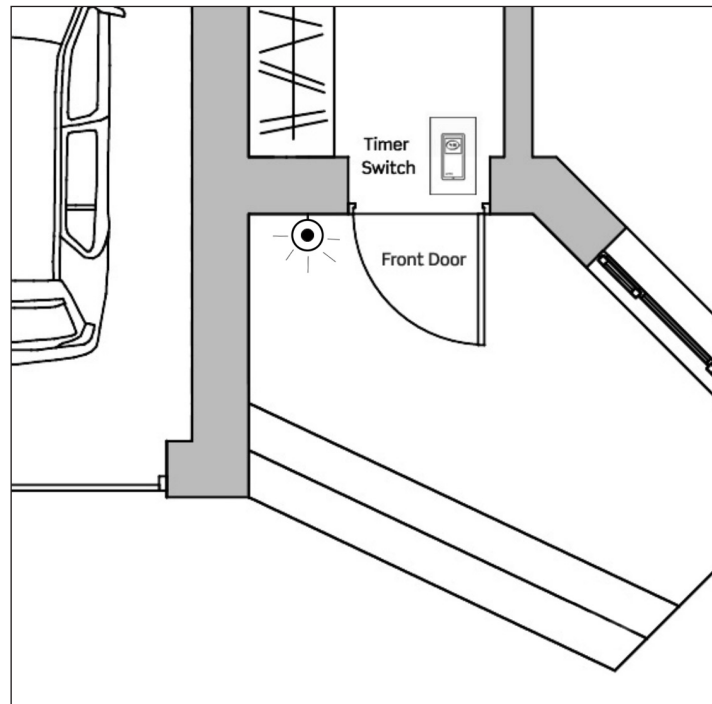

- Outdoor lighting in single-family residential buildings must be controlled by a manual ON and OFF switch that does NOT override to ON and one of the following:
 - Photocontrol and motion sensor
 - Photocontrol and automatic time switch control
 - Astronomical time clock
 - Energy management control system
- Manual override will return to normal operation within 6 hours
- Must be programmed to OFF during daylight hours

SOLUTION

The Leviton VPT24-16Z 24-Hour Programmable Timer can be used to comply with the 2019 California Title 24, Part 6, Outdoor Control Device Requirements.

- One program mode for astronomical clock, sunrise/sunset and daylight saving time
- Manual override returns to normal operation within 6 hours
- Timer settings at a glance with large, back-lit display
- Flexibility to program weekdays, weekends or any combination of days
- Rechargeable battery keeps time during temporary power outages
- Three colors offered in one box (white, ivory and light almond)
- Additional color change kits available
