LEVITON®

Decora Smart Zigbee Lighting Controls

Add Smart Lighting to a Zigbee Compatible System

Leviton's Decora Smart family of Zigbee enabled lighting controls are the perfect addition to any smart home using a Zigbee hub, gateway, or controller.

The new devices include in-wall lighting controls with full range dimming, switching, and plug-ins that are Zigbee 3.0 certified, offering the latest in Zigbee technology such as compatibility with many popular control systems including the Xfinity Home Touch Screen or Amazon Echo Plus and Echo Show (2nd Gen).

Wirelessly connect Decora Smart Zigbee devices to compatible Zigbee hubs for remote lighting control, scheduling, and inclusion in scene-based lighting and other home automation activities. Control lights from anywhere, reduce energy consumption, and enhance your home's wellness with customized lighting – all by making your favorite light fixtures smart.

Decora Smart Zigbee 3.0 products leverage Leviton's popular rocker paddle, along with compatible accessories including three-way companion remotes, color change kits, and wall plates. To meet any décor, color change kits are available in white, ivory, light almond, gray, black, and brown.

Zigbee 3.0 devices are backwards compatible with previous Zigbee generations and use mesh networking technology to provide quick, reliable, and secure communication to a wide variety of Zigbee certified smart products such as sensors, thermostats, locks, and more.

Designed for the future, Decora Smart Zigbee 3.0 products support LED and CFL lighting technologies as well as incandescent, halogen, and fluorescent load types.

**Agency Standing and Compliance
DG15S and DG15A**
- Complies with UL 917
- CSA Certified
- NOM Certified
- Complies with FCC Part 15, Class B
- Zigbee 3.0 Certified
