SmartlockPro® Electrical Safety Products

Fire and shock protection for your home and family.

They look similar but they provide very different protection.
AFCI

**Function**
- Helps protect your home from electrical fires that could result from arc-faults

**How it works**
- Detects potentially hazardous arc-faults and quickly cuts off power

**Where to use**
- In all living areas, such as bedrooms and living rooms

**Why?**
- Arcing faults are responsible for starting more than 28,000 home fires annually in the U.S.¹ More than 50% of these fires could be prevented with the installation of AFCIs, according to the Consumer Product Safety Commission.²

Did you know...

All SmartlockPro outlets feature Leviton’s Patented Reset Lockout protection which prevents the device from being reset if:
- it is not functioning properly
- protection has been compromised
- line and load wires were reversed during installation

---

**AFCIs protect your home**

**AFCI/GFCI Dual Function**

**Function**
- Helps protect your home and family from both shocks and electrocution due to ground faults and from electrical fires that could result from arc-faults

**How it works**
- Interrupts power if a ground fault or an arc-fault is detected

**Where to use**
- Kitchens and laundry rooms as well as a replacement option for ungrounded outlets in any area of the home

**Why?**
- A single device that can distinguish between a trip caused by a ground fault and a trip caused by an arc fault

---

**Convenience of in-room test and reset buttons on the face of the device, eliminating a trip to the service panel.**

**Visual indicators provide simple, intuitive feedback on power and protection status.**

---

**GFCI**

**GFCIs protect you and your family**

**Function**
- Helps protect your family from shocks and electrocution due to ground faults

**How it works**
- Interrupts power if a ground fault is detected

**Where to use**
- Near water sources, such as bathrooms, basements and garages

**Why?**
- There are nearly 400 electrocutions in the U.S. each year.

GFCIs could prevent nearly 70% of these occurrences²

---

**Convenience of in-room test and reset buttons on the face of the device, eliminating a trip to the service panel.**

**Visual indicators provide simple, intuitive feedback on power and protection status.**
