Tools needed to install your Device

- Slotted/Phillips Screwdriver
- Electrical Tape
- Pliers
- Ruler
- Pencil
- Cutters

Changing the color of your device

Your device may include color options. To change color of the face proceed as follows:

1. Push down tabs per diagram, one at a time and rotate forward to release
2. Attach new face by inserting bottom hinge tabs, then pivot and snap the color kit to attach

FEATURES

- Cat. No. IPS02 and IPV02 have a sensing area of coverage of 30 ft x 30 ft, and a sensing angle of 180° (see Sensing Area Coverage figure on page 2)
- Adjustable light and time-delay controls are located on the front of the device. See adjustment setting section on page 2 for details.
- LED indicator is used to alert the user of the status of the device.
- Adjustable Time Delay setting for 30 seconds, 5 minutes, 15 minutes and 30 minutes.
- Occupancy sensors can be converted to vacancy sensors. See Adjustment Section page 2.

NOTE: Use check boxes √ when Steps are completed.

LOCATION / MOUNTING

The device responds to temperature changes and care should be taken when mounting the device. DO NOT mount directly above a heat source, in a location where hot or cold drafts will blow directly on the sensor, or where unintended motion (e.g., hallway traffic) will be within sensor’s field-of-view.

INSTALLING YOUR DEVICE

NOTE: Use check boxes √ when Steps are completed.

WARNING: TO AVOID FIRE, SHOCK, OR DEATH;
TURN OFF POWER at circuit breaker or fuse and test that power is off before wiring!

Step 1

WARNING: TO AVOID FIRE, SHOCK, OR DEATH;
TURN OFF POWER at circuit breaker or fuse and test that power is off before wiring!

Step 2

Identifying your wiring application

- Most common:
  1. Line (Hot)
  2. Neutral
  3. Ground
  4. Load

Step 3

Preparing and connecting wires:

This device can be wired using side wire terminal screws. Choose appropriate wire stripping specifications accordingly.

Step 4

Single Pole Wiring Application:

- Terminal Screw marked Black (BK)
- Terminal Screw marked Red (RD)

WIRING SENSOR:

Connect wires per WIRING DIAGRAM as follows:

- If the wiring in the wall box does not resemble any of these configurations, consult an electrician.

- Connect wires per WIRING DIAGRAM as follows:
- Green or bare copper wire in wall box to Green terminal screw.
- Line Hot wall box wire to terminal screw marked “BK”.
- Load wall box wire to terminal screw marked “RD”.
- Proceed to Step 5.

- Adjust Time Delay setting for 30 seconds, 5 minutes, 15 minutes and 30 minutes.
- Occupancy sensors can be converted to vacancy sensors. See Adjustment Section page 2.
- LED indicator is used to alert the user of the status of the device.
- Adjustable light and time-delay controls are located on the front of the device. See adjustment setting section on page 2 for details.

Ratings: 120VAC, 60Hz - 300W Incandescent - 150W LED, CFL - 200VA ELV, MLV - Fluorescent 2.5A - Resistive - 1/6th HP

WARNING AND CAUTIONS:

- TO AVOID FIRE, SHOCK, OR DEATH; TURN OFF POWER AT CIRCUIT BREAKER OR FUSE AND TEST THAT THE POWER IS OFF BEFORE WIRING!
- To be installed and/or used in accordance with electrical codes and regulations.
- To avoid overheating and possible damage to this device and other equipment, DO NOT install to control a receptacle.
- DO NOT control a load in excess of specified ratings or you may damage property, or cause injury or death.
- If you are not sure about any part of these instructions, consult an electrician.
- Clean outer surface gently with damp cloth only. DO NOT use soaps or cleaning liquids.
- No user serviceable components. DO NOT attempt to service or repair.
- Use this device WITH COPPER OR COPPER CLAD WIRE ONLY.

- Cat. No. IPS02 and IPV02 have a sensing area of coverage of 30 ft x 30 ft, and a sensing angle of 180° (see Sensing Area Coverage figure on page 2)
- Adjustable light and time-delay controls are located on the front of the device. See adjustment setting section on page 2 for details.
- LED indicator is used to alert the user of the status of the device.
- Adjustable Time Delay setting for 30 seconds, 5 minutes, 15 minutes and 30 minutes.
- Occupancy sensors can be converted to vacancy sensors. See Adjustment Section page 2.

NOTE: If the wiring in the wall box does not resemble any of these configurations, consult an electrician.
**ADJUSTMENT SETTINGS**

1. With power restored and wall plate removed, remove face of device to expose setting controls, see color change instructions in page 1. Use your finger or a small screwdriver to adjust the light sensitivity and time settings on the device as follows:
   - **Light Level Adjustment:**
     - Turn the control clockwise. Lights will turn ON in lighter conditions.
     - Turn the control counter clockwise. Lights will turn ON in less lighting conditions.
   - **Time Selection:**
     - Adjust the time selector to the desired length of time the lights are to remain ON. Lights will remain ON from 30 seconds to 30 minutes after the room is vacated.
     - Turn the control clockwise. Lights will remain ON up to 30 minutes.
     - Turn the control counter clockwise. Lights will remain ON up to 30 seconds.

2. Test that the light level and time selection are as desired. If not, repeat adjustments until satisfied.

3. Mount wall plate. **INSTALLATION IS COMPLETE.**

**TRoubleshooting**

Lights do not operate with push pad and LED indicator does not blink when motion is present:
- Ensure proper ground connection is present in the wall box.

When confirmed, verify wiring connections to sensor.

Lights do not switch ON when motion is detected (IPS02):
- Motion is beyond sensing range, move closer to switch.
- Adjust the light level adjustment toward lighter (counterclockwise), depending on room conditions.

Lights always stay ON:
- Check time delay settings and compare to how long the lights stay ON.
- Ensure that no motion occurs in coverage area for time selected.
- Check that switch is not installed near a heat source (e.g., stove, lights, heat vents) or detecting motion from an adjacent area (e.g., hallway traffic). If so, switch may have to be relocated.

Lights do not turn ON - IPV02:
- Check that control is installed correctly.
- Check that power is ON.
- Check that light bulb is functioning.

**NOTE:** If problems continue, consult an electrician.

---

**Sensing Area Coverage**

**Light Level Adjustment:**

- 0: 30 Sec
- 1: 5 Min
- 2: 15 Min
- 3: 30 Min

**Time Selection:**

- 1: 2 Sec
- 1.5m 1.5m 30ft 9.1m
- 2: 30ft 9.1m
- 3: 30ft 9.1m

---

**FCC COMPLIANCE STATEMENT**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving Antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

FCC CAUTION

Any changes or modifications not expressly approved by Leviton Manufacturing Co., Inc., could void the user’s authority to operate the equipment.

**LIMITED 5 YEAR WARRANTY AND EXCLUSIONS**

Leviton warrants to the original consumer purchaser and not for the benefit of anyone else that this product at the time of its sale by Leviton is free of defects in materials and workmanship under normal and proper use for five years from the purchase date. Leviton’s only obligation is to correct such defects by repair or replacement, at its option, if within such five year period the product is returned prepaid, with proof of purchase date, and a description of the problem to Leviton Manufacturing Co., Inc., Attn: Quality Assurance Department, 201 North Service Road, Melville, New York 11747. This warranty excludes and there is disclaimed liability for labor for removal of this product or reinstallation. This warranty is void if this product is installed improperly or in an improper environment, overloaded, misused, opened, abused, or altered in any manner, is not used under normal operating conditions or not in accordance with any labels or instructions. There are no other or implied warranties of any kind, including merchantability and fitness for a particular purpose, and if any implied warranty is required by the applicable jurisdiction, the duration of any such implied warranty, including merchantability and fitness for a particular purpose, is limited to five years. Leviton is not liable for, and there is no warranty against, incidental, indirect, special, or consequential damages, including without limitation, damage to, or loss of use of, any equipment, lost sales or profits or delay or failure to perform this warranty obligation. The remedies provided hereunder are the exclusive remedies under this warranty, whether based on contract, tort or otherwise.

---

**FOR CANADA ONLY**

For warranty information and product returns, residents of Canada should contact Leviton in writing at Leviton Manufacturing of Canada Ltd to the attention of the Quality Assurance Department, 165 Hymus Blvd, Pointe-Claire (Quebec), Canada H9R 1E9 or by telephone at 1 800 405-5320.
