TO AVOID FIRE, SHOCK, OR DEATH; TURN OFF POWER AT CIRCUIT BREAKER OR FUSE AND TEST THAT THE POWER IS OFF BEFORE WIRING!

Common/Line Wire
Second Traveler Wire
No user serviceable components.

Identifying your wiring application
Two pigtail wires from the 3-Way switch.

WARNING AND CAUTIONS:

Do not use soap or cleaning liquids.

To avoid overheating and possible damage to this device and other equipment, DO NOT install to control a receptacle, a motor, or a transformer-operated appliance other than specified lighting load incandescent and LED.

When using in a 3-way application use one sensor and one standard 3-way switch. Cannot be used with another sensor, or in a 4-way application.

Preparation and connecting wires:
This device can be wired using side wire terminal screws. Choose appropriate wire stripping specifications accordingly.

WIRING SENSOR:
Connect wires per WIRING DIAGRAM as follows:
• Green or bare copper wire in wall box to Green terminal screw.
• One pigtail wire to the Black screw terminal marked “COM” and the Brass terminal marked “RD”.
• Termoox screw marked “3-way” should have Red insulation label (note color from step 2)
• Connecting the following 4 wires using an appropriately sized wire nut:
  1. Common/Load wire (identified in step 2)
  2. Two pigtail wires from the 3-way switch.
  3. One pigtail wire from the 3-way switch.
  4. One pigtail wire to the Brass screw terminal marked “RD”.

3-Way Wiring with 3-Way Switch Application:
When connecting the sensor for 3-way control, first choose which wall switch location the sensor will be installed in. Next, identify which electrical box has the line connection. If the line connection is in the box where the standard 3-way switch is located, use wiring diagram 4B. If the line connection is in the box where the sensor is located, use wiring diagram 4C.

NOTE: A pair of short pigtail wires will be needed for connection to the 3-way switch.

WIRING SWITCH:
Connect wires per WIRING DIAGRAM as follows:
• Green or bare copper wire in wall box to Green terminal screw.
• One pigtail wire to the Black screw terminal marked “COM” and the Brass terminal marked “RD”.
• Connecting the following 4 wires using an appropriately sized wire nut:
  1. Common/Load wire (identified in step 2)
  2. First Traveler wall box wire (note color from step 2)
  3. One pigtail wire from the 3-way switch.

Change the color of your device:
Pencil, Cutters, Ruler

Ratings:
120VAC, 60 Hz 600W Incandescent & 150W LED

INSTALLATION INSTRUCTIONS

Installation:

Cat. No. IPS06, IPV06 - INDOOR USE ONLY

WARNING: TO AVOID FIRE, SHOCK, OR DEATH, TURN OFF POWER AT CIRCUIT BREAKER OR FUSE AND TEST THAT THE POWER IS OFF BEFORE WIRING!

Preparing and connecting wires:
This device can be wired using side wire terminal screws. Choose appropriate wire stripping specifications accordingly.

3-Way Wiring with 3-Way Switch Application:
When connecting the sensor for 3-way control, first choose which wall switch location the sensor will be installed in. Next, identify which electrical box has the line connection. If the line connection is in the box where the standard 3-way switch is located, use wiring diagram 4B. If the line connection is in the box where the sensor is located, use wiring diagram 4C.

NOTE: A pair of short pigtail wires will be needed for connection to the 3-way switch.

WIRING SWITCH:
Connect wires per WIRING DIAGRAM as follows:
• Green or bare copper wire in wall box to Green terminal screw.
• One pigtail wire to the Black screw terminal marked “COM” and the Brass terminal marked “RD”.
• Connecting the following 4 wires using an appropriately sized wire nut:
  1. Common/Load wire (identified in step 2)
  2. First Traveler wall box wire (note color from step 2)
  3. One pigtail wire from the 3-way switch.

Change the color of your device:
Pencil, Cutters, Ruler

Ratings:
120VAC, 60 Hz 600W Incandescent & 150W LED

INSTALLATION INSTRUCTIONS

Installation:

Cat. No. IPS06, IPV06 - INDOOR USE ONLY

WARNING: TO AVOID FIRE, SHOCK, OR DEATH, TURN OFF POWER AT CIRCUIT BREAKER OR FUSE AND TEST THAT THE POWER IS OFF BEFORE WIRING!

LIMITED 5 YEAR WARRANTY AND EXCLUSIONS

Leviton warrants to the original consumer purchaser and not for the benefit of anyone else that this product at the time of its sale by Leviton is free of defects in materials and workmanship under normal and customary use and service for five years from the purchase date. Leviton’s only obligation is to correct such defects by repair or replacement, at its option, except that, within such five year period from the purchase date, Leviton may, at its option, repair or replace, or authorize repair or replacement of, products which are not repairable or which cannot be returned to their original specifications, at no charge to the consumer, to the extent that such defects arise from materials or workmanship defects, and which are notified to Leviton by the consumer within the five year period

Leviton is not liable for incidental, indirect, special, or consequential damages, including without limitation, damage to, or loss of any equipment, data or property, delay or failure of services, loss of business, lost or saved, or interrupted, or lost profits, or any other claims brought by consumer or any third party claim, unless caused by defects which arise from any material or workmanship defects.

TROUBLESHOOTING

For additional information, contact Leviton’s technical at 1-800-424-5455 or visit Leviton’s website at www.leviton.com

FCC COMPLIANCE STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) it must accept any interference received, including interference that may cause undesired operation of the device. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment OFF and ON, the user is encouraged to try to correct the interference by one of the following measures:

• Reorient or relocate the receiving Antenna.
• Increase the separation between the equipment and the receiver
• Connect the equipment into an outlet on a circuit different from that which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

FCC CAUTION

Any changes or modifications not expressly approved by Leviton Manufacturing Co., Inc., could void the user’s authority to operate the equipment.

FOR CANADA ONLY

For warranty information and/or product returns, residents of Canada should contact Leviton in writing at Leviton Manufacturing of Canada Ltd to the attention of the Quality Assurance Department, 165 Hymus Blvd, P Sainte Claire (Quebec), Canada H9R 1E9 or by telephone at 1 800 460-5320.

PROGRAMMED LIGHT SENSORS

**INSTALLATION INSTRUCTIONS**

**OPERATION**

PS600 Auto On: Lights will automatically turn ON when room is occupied or motion is detected. The PS600 will switch lights OFF when no motion is detected in occupied room after set period of time.

PS600 Manual: The PS600 requires the user to manually turn ON lights or the load by depressing the push pad on the device.

**ADJUSTMENT SETTINGS**

1. With power removed and control removed, remove face of device to expose setting controls, see color change instructions in page 1. Use a small screwdriver to adjust the light sensitivity and time settings on the device as follows:

**Light Level Adjustment:**

• Adjust the light level dial clockwise. Lights will turn ON in lighter conditions.
• Adjust the light level dial counter clockwise. Lights will turn ON in less lighting conditions.

**Time Delay Adjustment:**

• Adjust the time selector dial clockwise to decrease the duration of the ON time up to 30 minutes.

2. Test that the light level and time selection are as desired.

3. Mount wallplate. INSTALLATION IS COMPLETE.

**SENSING AREA COVERAGE**

See the Sensing Area Coverage Chart located at back of this manual and refer to section on Adjustment settings for Sensing Area Coverage calculations.

**TROUBLESHOOTING**

1. If lights fail to turn ON refer to the TROUBLESHOOTING section.

2. If lights fail to turn OFF refer to the TROUBLESHOOTING section.

3. If lights fail to turn ON or OFF refer to the TROUBLESHOOTING section.

**NOTE:**

• To operate IPV600 as a sensor (manual ON/Auto OFF), rotate the light level adjustment fully counter clockwise.

**NOTE:**

• All Rights Including Trade Dress Rights Reserved

**1. Position all wires to provide room in outlet wall box for device.**

2. Partially screw in mounting screws in wall box mounting holes.

3. Restore power at circuit breaker or fuse.

4. For PS600 lights will automatically turn ON after power is applied.

5. For IPV600 press and release pushpad to turn the lights ON.

6. See Locator Light Status chart to confirm the operational status of the device.

**NOTE:**

There are no other or implied warranties of any kind, including merchantability and fitness for a particular purpose.

**LIMITED 5 YEAR WARRANTY AND EXCLUSIONS**

Leviton warrants to the original consumer purchaser that this product is free of defects in materials and workmanship under normal and customary use for five years from the purchase date. Leviton’s only obligation is to correct such defects by repair or replacement, at its option, except that, within such five year period from the purchase date, Leviton may, at its option, repair or replace, or authorize repair or replacement of, products which are not repairable or which cannot be returned to their original specifications, at no charge to the consumer, to the extent that such defects arise from materials or workmanship defects, and which are notified to Leviton by the consumer within the five year period.

Leviton is not liable for incidental, indirect, special, or consequential damages, including without limitation, damage to, or loss of any equipment, data or property, delay or failure of services, loss of business, lost or saved, or interrupted, or lost profits, or any other claims brought by consumer or any third party claim, unless caused by defects which arise from any material or workmanship defects.

For warranty information and/or product returns, residents of Canada should contact Leviton in writing at Leviton Manufacturing of Canada Ltd to the attention of the Quality Assurance Department, 165 Hymus Blvd, Pointe Claire (Quebec), Canada H9R 1E9 or by telephone at 1 800 460-5320.
