WARNINGS AND CAUTIONS:
- **To avoid fire, shock or death; turn off power at circuit breaker or fuse and test that power is off before wiring!**
- To be installed and/or used in accordance with electrical codes and regulations.
- If you are unsure about any part of these instructions, consult an electrician.

DECORA Digital/DECORA Smart remotes are not compatible with standard 3-way or 4-way switches. They must be used with compatible DECORA Digital/DECORA Smart devices for multi-location switching.

**WARNINGS AND CAUTIONS:**
- Use this device WITH COPPER OR COPPER CLAD WIRE ONLY.
- Use only a 3-Way Digital/Digital Smart Dimmer switch in a multi-location circuit with up to 9 coordinating remotes.
- The remote(s) will turn the light on at the brightness level selected at the dimmer.
- Recommended minimum wall box depth for remotes is 2-1/2”.
- Maximum wire length from dimmer or switch to all installed remotes cannot exceed 300 ft (90 m).

**TOOL NEEDED TO INSTALL YOUR REMOTE**
- Slotted/Phillips Screwdriver
- Electric Tape
- Pliers
- Ruler
- Pencil
- Cutters
- Ruler

**INSTALLATION INSTRUCTIONS**

### 3-WAY APPLICATION

1. **Line or Load (Tagged)**
2. **Neutral**
3. **First Traveler (note color)**
4. **Second Traveler (note color)**
5. **Neutral**
6. **First Load (note color)**

**IMPORTANT:** For 3-Way applications, note that one of the traveler terminals from the old switch being removed will usually be a different color (Black) or labeled Common. Tag that wire with electrical tape and identify as the common (Line or Load) in both the dimmer wall box and remote wall box.

### 4-WAY APPLICATION

1. **Line Hot (Black)**
2. **Neutral**
3. **First Traveler (note color)**
4. **Second Traveler (note color)**
5. **Neutral**
6. **First Load (note color)**

**IMPORTANT:** For 4-Way applications, note that the traveler terminals from the old switch being removed will have 4 screws plus a ground screw. Tag the two wires connected to the two back screw terminals.

### Preparing and Connecting Wires

This remote can be wired using side wire terminal screws or through backwire openings.

**Step 1**
- Cut (if necessary)
- Strip Gage measure bare wire here
- 5/16" (1.6 cm)

**Step 2**
- Side Wire Connection
  - Side wire terminals accept #14-12 AWG solid copper wire only.
  - Make sure that the ends of the wire from the wall box are straight (cut if necessary).
  - Remove insulation from wires in the wall box as shown.

**Step 3**
- Back Wire Connection
  - 1 5/8" (1.6 cm)
  - Neutral (White)
  - White
  - Black
  - Red (RD)
  - Yellow/Red (YL/RD)
  - Green (G)

**Step 4**
- **WARNING: AVOID FIRE, SHOCK OR DEATH; TURN OFF POWER at circuit breaker or fuse and test that power is off before wiring!**

** Step 5**
- Insert top tabs and press in bottom tabs to attach.

### 3-WAY WIRING - Digital Smart Dimmer with DDOSR-01Z Coordinating Remote Application:

- **NOTE:** The wiring in the wall box does not resemble any of these configurations, consult an electrician.

### 4-WAY WIRING - Digital Smart Switch with DDOSR-01Z Coordinating Remote Application:

- **NOTE:** If the wiring in the wall box does not resemble any of these configurations, consult an electrician.

### WARNING:
- **NOTICE:** Do not use this device with COOPER OR COPPER CLAD WIRE ONLY.

### NOTICES:
- **NOTE:** The Digital Smart Dimmer must be installed in a wall box that has a Load connection. The DDOSR-01Z coordinating remote must be installed in a wall box with a Neutral connection.
- **NOTE:** When used with a Digital Smart Dimmer, dimming can only be performed from the dimmer location.

### Wiring Digital Smart Dimmer (wall box with load connection):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to First Traveler (note color as above).
  - Second Traveler wall box wire (note color as above) to terminal screw marked “YL/RD”. This traveler from the remote must go to the terminal screw on the dimmer marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.

### Wiring Digital Smart Switch (wall box with load connection):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to First Traveler (note color as above).
  - Second Traveler wall box wire (note color as above) to terminal screw marked “YL/RD”. This traveler from the remote must go to the terminal screw on the dimmer marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.

### Wiring Digital Smart Dimmer (no neutral application):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
  - First Traveler wall box wire to terminal screw marked “RD” (note wire color).
  - Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the remote must go to the terminal screw on the dimmer marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.

### Wiring Digital Smart Dimmer (no neutral application):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
  - First Traveler wall box wire to terminal screw marked “RD” (note wire color).
  - Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the remote must go to the terminal screw on the remote marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.

### Wiring Digital Smart Switch (no neutral application):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
  - First Traveler wall box wire to terminal screw marked “RD” (note wire color).
  - Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the remote must go to the terminal screw on the remote marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.

### Wiring Digital Smart Switch (no neutral application):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
  - First Traveler wall box wire to terminal screw marked “RD” (note wire color).
  - Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the remote must go to the terminal screw on the remote marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.

### Wiring Digital Smart Dimmer (no neutral application):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
  - First Traveler wall box wire to terminal screw marked “RD” (note wire color).
  - Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the remote must go to the terminal screw on the remote marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.

### Wiring Digital Smart Switch (no neutral application):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
  - First Traveler wall box wire to terminal screw marked “RD” (note wire color).
  - Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the remote must go to the terminal screw on the remote marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.

### Wiring Digital Smart Dimmer (no neutral application):

- **Connect wires per Wiring Diagram as follows:**
  - Green or bare copper wire in wall box to Green terminal screw.
  - Load wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
  - First Traveler wall box wire to terminal screw marked “RD” (note wire color).
  - Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the remote must go to the terminal screw on the remote marked “YL/RD”.
  - Neutral wall box wire to terminal screw marked “WH”.
Step 4d

NOTE:
• Proceed to Step 5.
• Second Traveler wall box wire to terminal screw marked “YL/RD”.
• First Traveler wall box wire to terminal screw marked “RD”.
• Line Hot (common) wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.

Connect wires per WIRING DIAGRAM as follows:
• Green or bare copper wire in wall box to Green terminal screw.
• Line Hot (common) wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
• First Traveler wall box wire to terminal screw marked “RD” (note wire color).
• Remove Red lead label from terminal screw marked “YL/RD”.
• Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the dimmer must go to the terminal screw on the remote marked “YL/RD”.
• Proceed to Step 5.

Step 4c cont’d.

NOTE:
• The DD0SR-01Z coordinating remotes must be installed in a wall box with a Neutral connection. Tighten screws.

Connect wires per WIRING DIAGRAM as follows:
• Green or bare copper wire in wall box to Green terminal screw.
• Line Hot (common) wall box wire identified (tagged) when removing old switch to terminal screw marked “BK”.
• First Traveler wall box wire to terminal screw marked “RD” (note wire color).
• Remove Red lead label from terminal screw marked “YL/RD”.
• Second Traveler wall box wire to terminal screw marked “YL/RD” (note wire color). This traveler from the remote must go to the terminal screw on the dimmer marked “YL/RD”.
• Neutral wall box wire to the terminal screw marked “WH”.
• Proceed to Step 5.

WIRING DIGITAL/SMART DIMMER (3-way wall box with Line Hot connection):

Connect wires as follows:
• Use backwire connections when connecting two wires to one screw terminal.
• Green or bare copper wire in wall box to Green terminal screw.
• Connect the First and Third Traveler wires together (note wire colors) with a wire nut.
• Fourth Traveler wire (color noted above) to terminal screw marked “YL/RD”. This traveler from the remote must go to the terminal screw on the switch marked “YL/RD”.
• Neutral wall box wire to the terminal screw marked “WH”.

WIRING DIGITAL/SMART DIMMER (4-way wall box):

Connect wires as follows:
• Use backwire connections when connecting two wires to one screw terminal.
• Green or bare copper wire in wall box to Green terminal screw.
• Load wall box wire identified (tagged) when removing old switch to Terminal screw marked “BK”.
• Fourth Traveler wire (color noted above) to terminal screw marked “YL/RD”. This traveler from the remote must go to the terminal screw on the switch marked “YL/RD”.
• Neutral wall box wire to the terminal screw marked “WH”.

WIRING DIGITAL/SMA RT DIMMER (4-way wall box with Load connection):

Connect wires as follows:
• Use backwire connections when connecting two wires to one screw terminal.
• Green or bare copper wire in wall box to Green terminal screw.
• Second and Fourth Traveler wires (note wire colors) to terminal screw marked “YL/RD”. This traveler from the remote must go to the terminal screw on the switch marked “YL/RD”.
• Neutral wall box wire to the terminal screw marked “WH”.

WIRING DIGITAL/SMART DIMMER (4-way wall box with Load connection):

Connect wires as follows:
• Use backwire connections when connecting two wires to one screw terminal.
• Green or bare copper wire in wall box to Green terminal screw.
• Second and Fourth Traveler wires (note wire colors) to terminal screw marked “YL/RD”. This traveler from the remote must go to the terminal screw on the switch marked “YL/RD”.
• Neutral wall box wire to the terminal screw marked “WH”.

LIMITED 5 YEAR WARRANTY AND EXCLUSIONS

Leviton warrants the original consumer purchaser and not for the benefit of anyone else that this product at the time of its sale by Leviton is free of defects in materials and workmanship under normal and proper use for five years from the purchase date. Leviton’s only obligation is to correct such defects by repair or replacement, at its option. For details, turn to the 1-800-423-6789. This warranty excludes and there is disclaimed liability for labor for removal of this product or reinstallation. This warranty is void if this product is installed improperly or in an improper environment, or in any manner, or not used under normal conditions or not in accordance with any instructions or warning. There are no other or implied warranties of any kind, including merchantability and fitness for a particular purpose. If any implied warranty is required by the applicable jurisdiction, the duration of any such implied warranty, including merchantability and fitness for a particular purpose, is limited to five years. Leviton is not liable for incidental, indirect, special, or consequential damages, including without limitation, damage to, or loss of use of, any equipment, lost sales or profit or delay or failure to perform this warranty obligation. The remedies provided herein are the exclusive remedies under the warranty, whether based on contract or otherwise.

FCC COMPLIANCE STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device. This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when operated in a residential environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to communications. However, there is no guarantee that interference will not occur in a particular installation. The equipment owner is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help in solving the problem.

FCC CAUTION

Any changes or modifications not expressly approved by Leviton Manufacturing Co., Inc. could void the user’s authority to operate the equipment.
