There are no other or implied warranties of any kind, including merchantability and fitness for a particular purpose, is limited to two years. Leviton is not liable for indirect, special, or consequential damages, including without limitation, damage to, or loss of use of, any equipment, lost sales or profits or delay or failure to perform this warranty obligation. The remedies provided herein are the exclusive remedies under this warranty, whether based on contract, tort or otherwise.

DESCRIPTION

The Remote Control has a user-friendly design to ensure comfortable hand-held usage. It is a component of a Leviton Lighting System and provides remote user control of the lights when used in conjunction with a Leviton Infrared-Receiving Device. The Remote provides the ability to program multiple light levels for the Lighting System. The Remote uses four AAA batteries*.

* Batteries not included

TO OPERATE

Open back cover of the Remote Control (refer to Figure 2). Insert Batteries as shown. Close back cover. Remote should be pointed in the direction of the Infrared receiving device and no more than 40 feet away.

ON: Press the ON button. The lights will fade ON.
OFF: Press the OFF button. The lights will fade to OFF.
DIM: Press and hold the  button to the desired level.
PRESETS 1, 2, 3, 4: Press the 1, 2, 3, or 4 button to have your lights fade ON to a user programmable preset level.

PROGRAMMABLE LIGHT LEVELS:
MAX: The maximum level the power pack will adjust the lights to.
MIN: The minimum level the power pack will adjust the lights to.
LIGHT MAINTAIN: The Light Maintain level is the amount of light that the Lighting System will maintain in the room. The Lighting System maintains a programmed light level by adjusting the lights to compensate for the ambient light present in the room. If the room is very bright (mid-day), the lights will automatically adjust to a DIM level. If the room is dark (evening and morning), the lights will automatically adjust to a BRIGHT level.
PRESETS: User programmable preset light levels.

PROGRAMMING:
Sea Instruction Sheet for the specific Leviton Infrared-Receiving Device that is being used in conjunction with Remote.

NOTE: Any level can be programmed or reprogrammed at any time.

TROUBLESHOOTING

• If the LED does not light when button is pressed, there is no power.
  - Check Batteries
• If the LED does light, check that the IR Receiving enabled device is installed properly, powered and functioning (refer to the specific IR Receiving Device Instruction Sheets).

Refer to Technical Manual for Troubleshooting and System Installation details.
