IT/AV Control Panel Set-Up Kit

APPLICATION
The Control Panel Set-Up Kit is used to copy and paste IR control codes to multiple IT/AV control systems. It is used with the Leviton 8-Button Control Panel Wallplate (part no. 41920-CP8) and HDMI and VGA Autoswitching HDBaseT™ Extender Wallplate (part no. 41920-HRC). The kit contains user instructions for the copy and paste process, a USB OTG adapter cable, a USB memory stick, and a small screwdriver. IR codes can be copied from an Autoswitching Wallplate to the memory stick and then pasted to another Autoswitching Wallplate in a matter of seconds, greatly improving the efficiency of setting up systems in multiple room installations where the same IR codes are utilized.

FEATURES
• 6” OTG USB adapter cable provides easy access to Autoswitching Wallplate “Program” port
• 4 GB (max memory size) USB memory stick compatible with IT/AV Autoswitching Wallplate
• Small Phillips screwdriver blade is used to press the “Learn” button on the Autoswitching Wallplate to activate the copy process

DESIGN CONSIDERATIONS
• See full 41920-CP8 instruction manual for details of 8-Button Control Panel Wallplate setup
• Leviton 8-Button Control Panel Wallplate (part no. 41920-CP8) and HDMI and VGA Autoswitching HDBaseT™ Extender Wallplate (part no. 41920-HRC) are sold separately.

COUNTRY OF ORIGIN
China
