MORE BANDWIDTH, HIGHER DENSITY, INCREASED SECURITY.

Support in the Field

Get the support you need with Leviton’s nationwide team of field-experienced specification engineers. Instead of being product focused, the team is service and solution oriented. They’ll work with you from initial design idea to move-in, ensuring that your equipment will provide optimal performance in each installation. They’ll analyze for accuracy, functionality, and compliance with TIA, IEEE, ISO, CSI, and other important industry standards. If you need help explaining the merits of one technology choice over another to your customer, they can help with that too.

All spec team members hold BICSI’s Registered Communications Distribution Designer (RCDD®) certification and are members of the Construction Specifications Institute. Simply put, they have the technical expertise, industry knowledge, design-build experience, and information to take your projects to the next level.

Solutions for Every Industry
Different companies have different networking priorities. Leviton’s specification experts can help ensure that the infrastructure you install is right for your organization’s unique requirements.

- Tech/Telecom
- Health Care
- Hospitality
- Finance & Insurance
- Industrial
- Data Centers
- Government & Military
- Education
- Retail/Consumer
- Manufacturing
- Transportation

Data Center Design
Get expert design and specification support from our data center design team. They provide customized technical support for your next data center project, including design, layout, elevations, and pathways. Contact our data center team at dcteam@leviton.com.

Expert Support
- Specification
- Design
- RFP/RFQ
- Standards

Spotlight | CAD Libraries
Get the latest detailed product drawings all in one place. Whether you need to know the exact specifications of a patch panel or a connector, you’ll find it in our consolidated CAD library. View a product from all angles so you have a better understanding for your next project.

Look for the link on the Consultant Connection homepage. www.leviton.com/networkconsultant
Print and Electronic Resources
Take advantage of Leviton’s tools for use in bids, design plans, RFPs, and specification documents. Materials, which are available on CD as well as online for download, include:

**Drafting & Design Tools**
- CAD files
- BIM (building information modeling) objects
- Visio stencils

**Sample Bid Spec/RFP Documents**
- CAT 5e/6/6a Division 16/27 Compliant
- Optical Fiber Division 16/27 Compliant
- CSI MasterFormat 2004 Division 27

In addition, you can use our literature and technical libraries to find a wealth of product and application information, including:
- Product spec sheets
- Application profiles
- Independent test data
- Instructional videos
- Wiring diagrams

Training
Attend our educational presentations to keep up to date on new technology, help save money, and keep your project in line with industry standards. Plus, you can earn up to five CECs for BICSI accreditations or one CEU through the American Institute of Architects (AIA).

Customers can learn more about emerging technologies and best practices with the spec team's Road Show seminars. The full-day sessions feature information about premises and data center environments, with topics ranging from liquid coolers and underfloor cable routing to 40G/100G fiber and virtualization.

Products and Systems

Copper Networks
CAT 6A/6/5e UTP Copper Systems | Connectors | Patch Panels | Patch Cords
The eXtreme® CAT 6A UTP System delivers guaranteed 10GbE permanent link electrical performance at distances as short as 10 feet with approved cable, and does not require time-consuming AXT field testing. Our eXtreme 6+ System offers exceptional headroom above CAT 6 requirements, while our GigaMax® 5e solutions offer an excellent balance of performance and value.

CAT 6A/6/5e Shielded Copper Systems | Connectors | Patch Panels | Patch Cords
Our shielded connectivity offers exceptional EMI/RFI protection and data signal isolation, ideal for government, healthcare, gaming, financial, and other sensitive environments. Shielded connectors have a robust die-cast housing, wide-angle hinge for easy access, and require no punchdown tool. Panels incorporate a stainless steel “comb” for consistent grounding, and can accept a mix of shielded, UTP, fiber, and A/V connectors.

Cable Management
Vertical | Horizontal
Get the perfect solution for your unique environment. Versi-Duct®, Leviton’s versatile injection-molded line, offers lightweight vertical and horizontal management for both copper and fiber installations. Horizontal and rear managers help properly support and organize cable at the rack. VELCRO® brand fasteners secure loose cabling without kinking, and are offered in numerous sizes, colors, and application-specific styles. Finally, the Fiber Raceway System is an adaptable system with a vast selection of components to fit in virtually any physical environment.

Fiber Networks
LOMM, MM, and SM Fiber Systems | Connectors | Enclosures | Adapters | Patch Cords
Leviton’s OM3 system is the first in the industry to achieve ETL verification of 10GBASE-S performance, while our OM4 /OM3 Opt-X® Unity system will get your network ready for 40G and 100G applications using industry-leading 24-fiber MTP connectors. In addition, our single-mode (OS1) connectivity supports transmission distances of more than 50 miles. Prevent unauthorized or inadvertent fiber network changes with the industry’s only truly secure keyed LC system, available in eight keyed colors.
Power Distribution

Basic | Metered | Switched

The FLX Series offers more than 127 configurations, allowing you to order the PDUs with the combination of features perfect for your application. Additional PDUs from basic (unmetered) to energy-efficient are available, 208V 3-phase units with remote management capabilities provide the functionality you need to protect your sensitive electronic equipment.

Residential

Structured Wiring | Audio | Video

Set up the perfect home or multiple dwelling unit (MDU) network with Leviton’s collection of high performance Connected Home products. Choose from an unparalleled selection of residential and commercial structured wiring, networking, audio, video, and telephone solutions.

Customized Solutions

Enclosures | Power | Trunks | Cords

Leviton’s Make-to-Order (MTO) team collaborates with end users, contractors, and suppliers to deliver original product designs to coordinate with any project. Whether it be specialized enclosures, pre-terminated trunks, or a custom patch panel, our MTO team ensures every new custom product meets the user’s unique vision and gets delivered to the jobsite fast. When the product you need can’t be found in any catalog, rely on our engineers and dedicated MTO experts to bring it to life.
Outstanding Return On Investment

Leviton Network Solutions supports commercial and residential networks around the globe with an unparalleled selection of high-performance network infrastructure products and systems. From the server room to the living room, our proven end-to-end performance keeps people connected.

But it’s not just products that make Leviton stand out. It’s also peace of mind. We stand behind every installation. We offer industry-leading performance with unbeatable service and support throughout the life of your structured cabling system. Add in the reassurance that comes from working with a stable, century-old supplier and you get far and away the highest return on investment in the industry.

Committed to Our Customers and the Environment

Leviton’s commitment to its customers plays out in many ways. It means the ability to provide long-term support through the life of your installation and beyond. It means solutions and service that meet the needs of every industry, around the globe. And it means a devotion to improving our communities and the environment. At our Network Solutions headquarters facility, we’ve retrofitted all our lighting fixtures, saving 270,000 kWh annually, and we monitor energy use with a Leviton-made sub-metering system. We recycle all scrap metal, and re-use leftover plastics in new production.

Leviton Network Solutions is part of Leviton Manufacturing, a family-owned business led by just three CEOs in its 100+ year history. Thousands of companies all across the globe have installed Network Solutions copper and fiber infrastructure systems. Mission critical data centers, universities and K-12 schools, hospitals, government agencies and military bases — you name it, we’ve done it.
WHEN YOU WORK WITH LEVITON’S SPEC TEAM, YOU KNOW YOU’RE GETTING EXPERT DESIGN AND SPECIFICATION ASSISTANCE.

The Industry’s Best Service and Support
With Leviton’s multi-tiered support structure you get the number one ranked service in the industry. From phone-based tech support to national and global teams of on-site, field experts, we’re here for you at every stage of your project.

Below are the teams that make us a company you can count on:
- Customer Service Representatives
- Technical Support Representatives
- Global Account Managers
- Specification Engineers
- Data Center Design Group
- U.S. Government Team
- Leviton Certified Contractors

A Culture of Ingenuity and Innovation
At Leviton, we’re continuously inventing the solutions that drive next-generation networks. Following a rigorous development process including multiple cycles of design, engineering and testing, we consistently deliver cutting-edge solutions for all types of networks.

Leviton’s extensive portfolio of patents and inventions includes a wide array of performance, design, and process enhancements that improve product functionality and streamline production. As a result, our innovative systems and solutions are continuously raising the bar on performance and aesthetic expectations. Have a unique requirement? Our engineers can work with you to design and manufacture a solution that meets your specific application requirements.

Quality and Performance in Every Solution
You expect outstanding product quality. Leviton delivers. Our products and systems feature robust construction that reduces maintenance and downtime, and headroom that exceeds standards to boost network performance.

Leviton manufactures all of its branded products at company owned, ISO 9001-2000 certified plants; the majority are made in the U.S. at facilities collocated with our product development teams. System and product performance is verified at certified in-house labs and by ETL, UL, and other globally recognized independent testing organizations, under real-world and extreme conditions.
THE SMART CHOICE FOR A BETTER NETWORK

High-performance connectivity backed by the industry’s best service and support

We invent the industry’s best technologies. We build them to last. And we stand behind every product and every installation – delivering industry-leading performance and unbeatable service and support – throughout the life of your structured cabling system. Add in the peace of mind that comes from working with a stable, century-old supplier and you get far and away the highest return on investment in the industry.
