D8000 Entry Station Installation Instructions

**Diagram**

- **STEP 1:** Locate female connector provided and terminate wires as shown.
- **STEP 2:** Insert the wired connector through the hole in the back of the wall strap. Attach the wall strap to the electrical box as shown, using (2) 6-32 x 1" screws provided.
- **STEP 3:** Plug connector onto back of the button assembly as shown. Push the wire into the wire-way in between the shroud and the back of the wall box. Ensure the correct luminaire is off-switch setting prior to installation.
- **STEP 4:** Hook the top of the wall plate over the angled tab on the wall strap, and rotate the assembly back into place.
- **STEP 5:** Use a #2 Phillips screwdriver with a 0.125 O.D. to seat the retaining screw into the slot on the inside of the wall plate by turning it counter-clockwise. Screw should be turned only until snug.
