Check that the unit has not been damaged during transport

Read all cautions and warnings prior to operation of this equipment

Protection Against Fire

1. Maintain a minimum of 2 foot distance from any type of flame.
2. Replace fuse only with the specified type and rating.
3. Do Not install the unit to close to a heat source.
4. Make sure cable are properly secured.
5. Maximum surface operating temperature 80°C.

Protection Against Fire

1. Disconnect power before servicing.
2. For connection to main power supply proceed to page 5.
3. This unit must be earthed. (electronically grounded)
4. This product is intended for indoor use only.
5. To prevent risk of fire or shock, do not expose fixture to rain or moisture.

Protection Against Mechanical Hazards

1. Use quality clamps or bolts when positioning unit.
2. Do not open unit while it is on, risk of electrical shock.

Installation

The Enlighten Splitter can be rack mounted from the front or back or wall mounted. For wall mount, remove the rack ears on the front panel and screw them on the side panels. For rear mounting remove the rack ears from the front and mount them on the rear panels.

DMX-512 Connection

The Mega Splitter is a DMX signal amplifier and distributor. The unit allows you to split a DMX signal into four separate signal outputs. Also it boost your DMX signal for extensive cable runs between DMX lighting fixtures.

5. Not Used

DMX-output
**Operation**

1. Upload your software into the computer. Software is located inside the USB Storage device (included in package). You can also use this device to store your show. The most current version of the Enlighten Software can be downloaded from the Mega-Lite website at www.mega-lite.com

2. After software has been installed connect via USB cable (included in package), to the front of the Enlighten Splitter. Turn the Enlighten Splitter power on. The Red LED’s on channel 1 through 4 indicate there is power present. When the Green LED are flashing that indicated that the outputs are sending DMX signal.

---

**Caution!**

Do not connect a second DMX controller to the DMX input while the Computer is connected via the USB.

2. Use the four output channels to send DMX signal to your DMX fixture. (You can use either the 3 or 5 pin XLR connection).
Cleaning and maintenance

Installation Maintenance: The operator has to make sure that the unit is operating safely and has the installations and electronics checked by an expert every 2 years.

The following points have to be considered during the inspection:

1) All screws used for installing the device or part of the device have to be tightly connected and must not be corroded.
2) There must not be any deformations on the housing, fixation and installation spots (ceiling, suspension, trussing).
3) The power supply cables must not show any damages, material fatigue [e.g. porous cables] or sediments. Further instructions depending on the installation spot and usage have to be adhered by a skilled installer and any safety problems have to be removed.

Caution Danger to life!

Disconnect from mains before starting maintenance operation!

Note: There is no serviceable parts inside the device except for the LED’s. Maintenance and service operations are to be carried out by authorized dealers.

Replacing the fuse: Only replace the fuse with the same type and rating.

Replacing the power cable: If the power cable of this device becomes damaged, it has to be replaced by authorized dealers only in order to avoid hazards.

Should you have further questions, please contact your dealer.
