WARNINGS AND CAUTIONS:

- TO BE INSTALLED AND/OR USED IN ACCORDANCE WITH APPROPRIATE ELECTRICAL CODES AND REGULATIONS.
- IF YOU ARE NOT SURE ABOUT ANY PART OF THESE INSTRUCTIONS, CONSULT AN ELECTRICIAN.

DESCRIPTION:
The Key Card Switch is a battery-free wireless transmitter that communicates with a wide variety of receivers. Every time a card is inserted a small micro-generator produces a small electrical current that powers a built-in transmitter. This transmitter sends wireless signals that command the receiver to turn the power supply to a device on. It signals the receiver to turn the power supply off again when the card is removed.

COMPATIBLE DEVICES:
- 3-Wire Relay
- 5-Wire Relay
- Plug-in Dimmer/Relay
- 4-Channel Low Voltage Receiver
- Room Controller
- Thermostat
- More receivers available

EQUIPMENT NEEDED FOR INSTALLATION

- Slotted Screwdriver
- Hammer
- Drill
- 5/16" drill bit
- Mounting tape (for adhesive mount only)
- Plastic wall anchors and/or screws (for screw mounting)

PROGRAMMING AND ACTIVATION:

1. Be sure not to mount the switch until after it has been programmed to all appropriate receivers. Test the range of the wireless light switch before mounting.
2. Make sure the switch is within 5 meters of the desired receiver when programming. Receivers have reduced range during programming.
3. **PROGRAMMING**: To associate a key card switch with a receiver, simply insert the card into the keycard switch while the receiver is in the desired Program Mode (see receiver installation guide for information on how to program the receiver).
   
   **PLEASE NOTE**: The Key Card Switch is designed for use in Momentary Mode. Do not insert the card multiple times while in Program Mode to avoid inadvertently un-learning switch associations.
4. **Activation**: Once a key card switch has been associated with a receiver, insert the card to control the load.

INSTALLATION

Wireless light switches can be surface mounted using screws or adhesive.

SCREWS (SURFACE MOUNT):

1. Remove the Faceplate by unscrewing the two slotted screws. Set screws and Faceplate aside for later use (Step 4).
2. If necessary, drill four pilot holes into the wall.
3. Use suitable screws to mount the wireless light switch to the wall.
4. Re-attach the Faceplate.

ADHESIVE (SURFACE MOUNT):

1. Apply adhesive to the Back Plate of the switch.
2. Affix the switch to the wall.
