Plug-and-Play Submetering and Energy Data Visualization
Monitor Virtually Any Building Type
No Recurring Fees. No Hidden Costs.

Complete Metering Solutions by VerifEye™

REDUCE COST AND COMPLEXITY OF IDENTIFYING ENERGY SAVINGS THROUGH SUBMETERING
Installation costs can easily exceed the cost of the actual submetering system making access to interval energy data cost-prohibitive to the end-user. A fully integrated plug-and-play submetering solution that requires no external power significantly reduces installation time and cost and is an excellent first step for capturing building energy use.

With the Energy Monitoring Hub+ (EMH+), contractors can now offer their customer a cost-effective, reliable submetering solution for monitoring building-level energy consumption. The EMH+ is built on an open architecture and is easily expanded to collect other utility data like water, gas, and steam, or easily share data with existing building automation or legacy systems. The EMH+ is the logical first step for energy measurement and verification.

PROBLEM
Customer wants building-level interval data and this is cost-prohibitive with labor for installation and set-up of metering system.

• The complexity of some submetering systems can make installation cost-prohibitive
• Additional software, licenses, and commissioning greatly increase costs
• Customer building types and electrical services vary
• Certain state energy codes now require metering
• External power for devices not always available
• Networking and communication systems were complex to commission

SOLUTION
Easily install complete metering system.

• The EMH+ greatly reduces installation time and cost with an integrated, line-powered meter
• Combined with Leviton’s free online energy data visualization service, Building Manager Online (BMO) software, users have an end-to-end solution to meet energy codes
• The EMH+ offers a complete metering system for virtually any building type and service
• LCD touch screen for ease of set-up/commissioning - no laptop required
BASIC INTEGRATED METERING SOLUTION
Energy Monitoring Hub+ (EMH+)
A8814-XS3*
• Integrated revenue-grade meter and data acquisition HUB tracks real time energy usage, monitors critical lighting and HVAC systems, and seamlessly integrates with BMS systems.

Building Manager Online (BMO) Energy Monitoring Software
Available at no cost with the purchase of VerifEye EMH+.
• Allows users to quickly access energy consumption from a web-based platform.

* Replace X to indicate amperage: 1=100A, 2=200A, 3=300A, 4=400A, 6=600A
