The Smart way to choose In-Wall USB Chargers

Why choose Leviton In-Wall USB Chargers?

In-wall USB chargers are fast becoming a necessity in homes throughout the country. Did you know most American households have an average of four electronic devices that require charging? As their numbers grow, so too does the web of cables and jumbled devices that are clustered around a single charger – not to mention the adapters that are always missing. By installing multiple in-wall USB chargers in places like kitchens, bedrooms, dens and home offices, you can add real value by making charging faster and easier.

USB TYPE A

USB TYPE-C™

Futureproof Charges both USB Type A for current phones/tablets and Type-C™ for newer and future devices.

Durable High-quality materials, tamper-resistant for safety and charging ports that can withstand 10,000+ insertions.

Easy Easily replaces a standard outlet, so installation is fast and efficient.

Smart Smart chip technology recognizes and optimizes the charging requirements of individual devices.

Convenience Charges multiple devices using USB ports, which frees outlets for other uses.

Power Up to 5.1A charging capacity, 25+ watts of power.

Performance Smart chip for faster charging.

It’s important to always choose outlets from a trusted brand like Leviton to ensure electrical safety and functionality.

What to look for when choosing an In-Wall USB Charger

There are many in-wall USB chargers on the market. While they may look similar, Leviton offers Type A and Type-C™ in one duplex application.

Tips to Optimize Charging

Turning off the device.

Plugging directly into the USB port.

Using the cable that came with the device – if that’s not available, use an OEM-grade cord that is approved by the device manufacturer.

Using a short cord. Longer cables take longer to charge.

Charge Faster and Enjoy Your Devices More!
