Dimming and Scheduling for Cost-Effective Control
Combine the best of both systems with EZ-MAX Plus® and IRC

EZ-MAX Plus Relay Control System and IRC Room Control
UTILIZE THE IRC’S DIMMING CAPABILITIES WITH THE SCHEDULING REFINEMENT OF EZ-MAX PLUS

The Leviton Integrated Room Control (IRC) is designed to be a simple and cost-effective ASHRAE Standard 90.1 2010 and California Title 24 2013 solution that includes dimming, daylight harvesting, demand response, plug load control, partial-ON and partial-OFF capabilities. The EZ-MAX Plus® Relay Control System includes a built-in astronomical time clock that allows users to program lighting controls based on schedules and sunrise/sunset events. By combining an IRC and an EZ-MAX Plus, facilities can achieve a cost-effective scheduling solution that incorporates constant, even dimming for improved lighting quality and energy code compliance.

PROBLEM
Retail store requires a cost-effective lighting control solution that will operate based on preset schedules and includes dimming capabilities.

- Facility is not large or complex enough to require the advanced capabilities and commissioning of the GreenMAX® Relay Control Panel system
- Standalone retail facility includes a self-contained parking lot with outdoor signage
- Manager’s office in store requires plug load controls per ASHRAE 90.1 and Title 24 requirements
- Retail facility includes LED lighting fixtures

SOLUTION
Combine an EZ-MAX Plus Relay Control System for time clock scheduling with an IRC room control for dimming control.

- The EZ-MAX Plus and IRC are cost-effective options that are ideal for smaller, less advanced applications such as retail spaces, restaurants and small- to medium-sized commercial facilities
- The EZ-MAX Plus provides code-compliant parking lot and outdoor signage control—the built-in astronomical time clock triggers the IRC to dim lighting based on schedules and sunrise/sunset events
- The EZ-MAX Plus switches controlled receptacles on and off based on occupancy sensor signals or schedules without the need of an additional power pack
- The EZ-MAX Plus/IRC solution is LED Ready to control 1-10V lights and fixtures

**EZ-MAX Plus and IRC Scheduling and Dimming Control Solution**

**USE WHEN:**
- Dimming capabilities are required, as in certain ASHRAE Standard 90.1 2010 and California Title 24 2013 applications
- Cost-effectiveness and easy commissioning are key
- Simple schedules are appropriate based on astronomical time clocks and sunrise/sunset scheduling
- Plug load/receptacle control is required
- Facilities with outdoor lighting, such as parking lot lights and illuminated signage

**IDEAL APPLICATIONS:**
- Retail spaces
- Restaurants
- Small- to mid-sized commercial buildings
