DZPD3-1LW

Z-Wave Enabled 100-Watt LED/CFL or 300-Watt Incandescent Scene Capable Plug-In Lamp Module with LED Locator - White

The wireless Leviton DZPD3 is a Z-Wave enabled universal lamp module designed for use for most residential lighting applications. A large range of lighting loads are supported including dimmable LED and CFL, as well incandescent or halogen. The DZPD3 is fully compatible with the Wink Hub, Samsung SmartThings, as well as all other certified Z-Wave controllers. As an extension to these hubs, Amazon Echo, Fire TV, Echo Dot, and Amazon Tap may be utilized for voice control over your DZC lighting products.
