Decora Motion Sensor In-Wall Dimmer, Auto-On, 2.5A, Single Pole or 3-Way

Occupancy/Motion detector and dimmer, 180 Degree PIR Wall Box Sensor, Single Pole & 3-Way, 600 Watt Incandescent, 150W Dimmable LED & CFL. White assembled on the device, ivory and light almond color change kit included. Wallplate/Faceplate Not Included.

Leviton’s IPVD6/IPSD6 Universal Vacancy and Occupancy Sensors combine state-of-the-art technology with new aesthetics to provide optimal management of lighting and motor loads and a choice of either Manual-ON (Vacancy Sensor) or Automatic-ON (Occupancy Sensor) switching. These energy-saving sensors are engineered to control current LED, CFL and incandescent loads and ensure that lights/motors will turn ON manually (vacancy) or automatically (occupancy) and turn OFF automatically when motion is no longer detected within the covered range. Designed to fit in a standard wallbox, both devices offer 180° Field of View and 900 sq. ft. of coverage. All models have screw terminals for easy installation and do not require a neutral wire for connection. The devices feature a time delay setting which allows users the option to delay the lights/motor load from switching off for 30 seconds, 5 minutes, 15 minutes or 30 minutes. For example, closet lighting would ideally be set to turn OFF in 30 seconds while a bathroom fan may be set to turn OFF 15 minutes after the space is vacated.

The IPVD6/IPSD6 is a dimming sensor, featuring the ability for users to easily adjust lighting levels of compatible dimmable LED, dimmable CFL and Incandescent lamps for energy-efficiency and ambiance. A built-in advanced starting technology ensures smooth start-up for hard to start CFLs.

Features and Benefits
- Universal Light Control & Dimmer - Easily Switches Incandescent and Dimmable CFL, LED bulbs
- Automatic-ON/Automatic OFF operation for seamless energy management
- Single Pole or 3 Way when used with a standard 3-way switch
- Low-Profile design eliminates an obtrusive “scanning device” look. Elegant styling compliments any interior and coordinates with Leviton’s popular line of Decora® wiring devices
- 180 degree field-of-view provides approximately 900 square feet of coverage suitable for bathrooms, basements, garages, utility rooms and a variety of other residential areas
- Convenient push-button provides Manual OFF light switching at any time
- Segmented lens provides optimum sensitivity and performance. It is designed
with an extensive “minor motion” area where even slight body movements will be detected.

- Four optional manual adjustments for delayed-OFF time settings maximize energy savings: 30 seconds (for walking test), 10 minutes, 20 minutes and 30 minutes.
- LED Indicator Light flashes when sensor detects motion to verify detection is active.
- Fits in standard wallbox and replaces single-pole wall switch.
- Neutral wire not required, suitable for retrofit and new construction applications.
- Can be used to comply with 2016 California Title 24, Part 6 Vacancy Control Device Requirements.
- Five-Year Limited warranty.
